

AV**Low-voltage Wires for Automobiles****SCABLE****APPLICATION**

Wires used in low voltage circuits in automobiles(vehicles and motorcycles)

A : Low-voltage wire for automobiles

V : Vinyl

FEATURES

General purpose cable for automobiles , they are used in low voltage circuits such as starting charging , lighting , signal and instrument panel circuits.

Standard to JIS C 3406 , JASO : D611

*1 The "f" in the nominal size indicates a flexible conductor with finer wire diameter.

*2 The current limit date is for conductor temperature of 80°C (Maximum allowable temperature) and an ambient temperature of 40°C

*3 Standard packing shapes shall be coils.However , products which length are indicated in () shall be wound on drums.
