

## APPLICATION

Wires used in low voltage circuits in automobiles(vehicles and motorcycles)

A : Low-voltage wire for automobiles

V : Vinyl

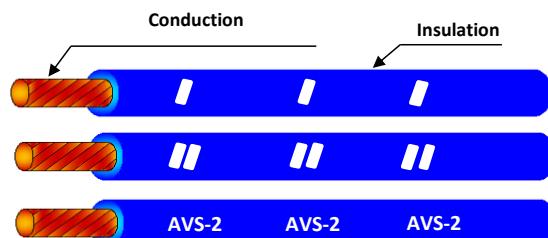

S : Thin type

## FEATURES

Constructed thinner than AV wires while providing equivalent performance , for lighter weight and smaller diameter applications.

Standard to JASO D611

## CONSTRUCTION AND PERFORMANCE

Conductor (Annealed copper stranded conductors)				Insulation Thickness	Overall Diameter		Identification marking Code	Conductor resistance (20°C)	Current *1 limit	Approx. weight	Standard *2 length
size	Construction	Calculated area	Outer Diameter		Standard	Max.					
(No. / mm)	(mm²)	(mm²)	(mm)	(mm)	(mm)	(mm)	Marking	(mW / m)	(A)	(g / m)	(m)

\*1 The current limit data is for conductor temperature of 80°C (Maximum allowable temperature)

and an ambient temperature of 40°C

\*2 Standard packing shapes shall be coils

Restriction of Hazardous Substances

Registration Evaluation and Authorization of Chemicals

Flameability Resistance

Abrasion Resistance
